

Automatic SB-Weight&Cut

Diagonal cutter for weight-accurate halving of sausage products

Machine equipment:

- control panel with touch display
- product measurement via load cells
- integrated infeed and outfeed conveyor
- knife blade only 1mm thick and 7mm or 14mm wide
- knife speed pneumatically adjustable
- product retainer pneumatically adjustable
- feed hopper for manual feeding
- Stand-Alone-machine with the possibility of linking and integration to an automatic production line
- heated control cabinet

Technical data

Power supply:	4 kW
Supply voltage:	400V AC / 50 Hz
Control voltage:	24V DC
Protection class:	IP 65
Compressed air:	quick coupling DN 7,2
Consumption:	40 l/min
Working pressure:	6 – 8 bar
Noise level:	< 70 dB(A)
Dimensions:	1.786 x 872 x 1.322 mm
Weight:	approx. 400 kg

Advantages:

- high performance owing to reciprocal cut with double-edged blade
- precise measurement via load cells
- clean cut
- low force impact on the product
- modern hygienic design
- high operational safety

Subject to technical changes.

Performance data:

Product diameter:	Ø 35 - 75 mm
Product length:	190 - 300 mm
Capacity:	35 - 40 pc./min depending on product
Cutting angle:	45 - 90°, stepless adjustable
Accuracy:	± 2 %
