

PHT - HYGIENE

CHANGE ROOM EQUIPMENT

PHT change room equipment for more product safety

Hygiene and product safety start even before the hygiene-sensitive areas - namely in the change rooms. This is where a well thought-out overall concept and hygienic design of the facility are crucial. PHT has decades of experience in change room concepts and can create the right concept for you.

Wardrobes PREMIUM

- Additional stability thanks to the 0.9 mm thick sheet steel
- Guaranteed durability thanks to two reinforcement profiles over the entire door height
- No risk of injury: double edging prevents sharp edges throughout
- Steel cabinets 'Made in Germany'
- Overall concept for an improved workflow tailored to the operation
- Customised to your requirements: Nameplates, numbering, cabinets with open storage compartments, interior, etc.

- Compartment width: 300, 350 or 400 mm
- Compartment depth: 500 mm

Cabinet depth	500 mm					

Cabinet housing

Particularly sturdy construction made of top quality sheet steel St 12.03, approx. 0.90 - 1.50 mm thick. Housing fold folded in such a way that there is no risk of injury. Bottom shelf and hat shelf without front upstand for easy cleaning. Stud feet 150 mm high, galvanised and coated in locker colour. Lockers with straight roof as standard, with sloping roof or air duct for an on-site exhaust air system on request at an extra charge.

Interior equipment

- Permanently welded hat shelf in each compartment
- Clothes rail with 3 plastic sliding hooks in each compartment
- A towel hook on the inside of each door
- Wardrobes with 2 compartments one above the other
- Z-compartments one clothes rail with 3 sliding hooks per compartment
- Wardrobes with 3, 4 or 5 compartments on top of each other without interior equipment

Doors

- Doors that fold into the housing, which are bevelled and flanged on all sides so that there is no risk of injury
- Reinforcing profile on the inside of the locking side along the entire height of the door
- 2 sturdy, internal hinges made of galvanised sheet steel
- 2 rows of longitudinal slits 28 mm high, 3 mm wide, 6 mm web at the top and bottom

Door types

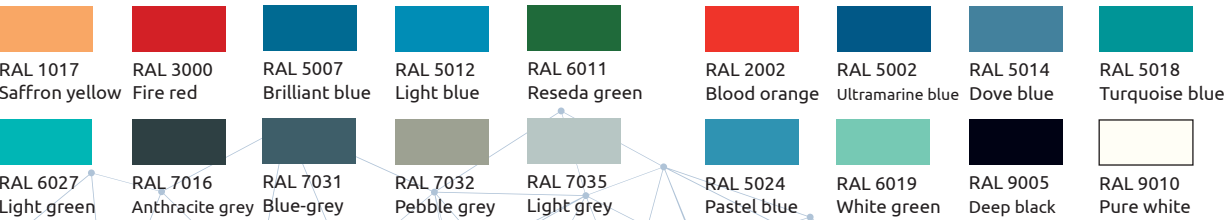

1. Door top and bottom each with 2 rows of longitudinal slits 28 mm high, 3 mm wide, 6 mm web
2. Top and bottom door each with 4 ventilation slots
3. Perforated door with 10 mm round perforation, 5 mm web
4. Perforated door with square perforation 23 x 23 mm, 5 mm web
5. Steel mesh door made of a sturdy flat iron frame with welded-in steel mesh 3 mm thick, mesh size 25 x 25 mm
6. Corrugated mesh door made from a sheet steel frame with welded-in corrugated mesh
7. Solid sheet metal doors in smooth design without ventilation slots

Surface

High-quality and resistant powder coating in RAL colours according to our colour group 0, coating thickness 60 - 80 µm, other RAL colours by arrangement. Electrolytically galvanised, phosphated and chromated quality sheet steel with powder coating for damp rooms or clothing at an extra charge.
