

PHT

stands for Partnership, Hygiene and Technology

To help you find your way around the PHT world, we have organized our portfolio according to three business units:

Partnership

Service

From conceptualization, detailed technical planning to total hygiene packages

After-Sales-Service

From delivery and installation, training and commissioning, as well as start-up, up to maintenance and a service contracts

Hygiene

Employee hygiene

We cover all hygiene-relevant points in your workflow starting with access control, from change rooms and canteens to hygiene lobbies and all necessary hygiene equipment for your facility.

Facility hygiene

Everything you need for cleaning your facility and machines: From high-quality brush ware to low-pressure foam cleaning technology, coupled with all the required accessories for drainage systems, and complete furnishing of your chemicals room.

Technology

Cleaning and drainage technology

We offer innovative cleaning and drying technology for all tubs, containers, trolleys and transfer systems in your facility. And because thinking about hygiene does not end at the wastewater outlet of a machine, we also offer appropriate drainage technology.

Handling and logistics systems

From the design and installation of high-quality, hygienic stainless steel equipment to automated lifting and tilting systems and technology for conveyor, racking and commissioning systems. Modern systems protect your products and reduce the time spent on the production floor, and so promote hygiene.

We further design customized hygienic slaughtering, deboning and cutting as well as smoking and cooking systems. Modern systems, for example UV and Microwave technology, protect your products, shorten the time required for manual input and thereby increase the overall hygiene.

There's added value in it:
Quality is not negotiable.

InnovationX
Next generation hygiene technology

With our decades of experience, we have developed the next generation of hygiene technology:
The PHT product series InnovationX.

InnovationX takes personnel hygiene to a new level.
With the aim of offering our customers maximum benefit and fair prices, our own products not only meet the highest quality and hygiene standards, but are also always one step ahead thanks to well thought-out details and maximum ease of service.

From hand cleaning basins to access control, everything is developed in-house at PHT and manufactured to the highest quality standards.
In operation, you benefit from resource savings, modular solutions and maximum product safety.

Holistic hygiene solutions

To achieve success, you have to think bigger.

PHT products in Facility Hygiene

Sole and wheel cleaning
Hygienic Floor System

Foam cleaning
Mainstation

Mobile trolley for
satellite, hose and chemistry

Shadow board

Multi-booster

Dosing station for
pre-dissolved chemistry

Chemistry bulk

Chemical transfer system
from large to small bulks

Satellite SU 0127 Baseline

Nozzle holder

Automatic system
for programmable
foam cleaning

Hose reel

Satellite SU 0127

Lockable canister holder

Hygienic production with innovative cleaning systems

Facility Hygiene

The right facility hygiene is a decisive factor in a functioning overall hygiene concept. PHT develops well thought-out concepts for industrial hygiene for the food industry and companies with hygiene-sensitive areas, in which all components are interlinked. This begins with the innovative low-pressure foam cleaning system and extends to the professional cleaning requirements according to the colour system, which offer the highest level of hygiene and also maximum occupational safety.
