

PHT

stands for Partnership, Hygiene and Technology

To help you find your way around the PHT world, we have organized our portfolio according to three business units:

Partnership

Service

From conceptualization, detailed technical planning to total hygiene packages

After-Sales-Service

From delivery and installation, training and commissioning, as well as start-up, up to maintenance and a service contracts

Hygiene

Employee hygiene

We cover all hygiene-relevant points in your workflow starting with access control, from change rooms and canteens to hygiene lobbies and all necessary hygiene equipment for your facility.

Facility hygiene

Everything you need for cleaning your facility and machines: From high-quality brush ware to low-pressure foam cleaning technology, coupled with all the required accessories for drainage systems, and complete furnishing of your chemicals room.

Technology

Cleaning and drainage technology

We offer innovative cleaning and drying technology for all tubs, containers, trolleys and transfer systems in your facility. And because thinking about hygiene does not end at the wastewater outlet of a machine, we also offer appropriate drainage technology.

Handling and logistics systems

From the design and installation of high-quality, hygienic stainless steel equipment to automated lifting and tilting systems and technology for conveyor, racking and commissioning systems. Modern systems protect your products and reduce the time spent on the production floor, and so promote hygiene.

We further design customized hygienic slaughtering, deboning and cutting as well as smoking and cooking systems. Modern systems, for example UV and Microwave technology, protect your products, shorten the time required for manual input and thereby increase the overall hygiene.

There's added value in it:
Quality is not negotiable.

InnovationX
Next generation hygiene technology

With our decades of experience, we have developed the next generation of hygiene technology:
The PHT product series InnovationX.

InnovationX takes personnel hygiene to a new level.
With the aim of offering our customers maximum benefit and fair prices, our own products not only meet the highest quality and hygiene standards, but are also always one step ahead thanks to well thought-out details and maximum ease of service.

From hand cleaning basins to access control, everything is developed in-house at PHT and manufactured to the highest quality standards.
In operation, you benefit from resource savings, modular solutions and maximum product safety.

Holistic hygiene solutions

To achieve success, you have to think bigger.

PHT products in Personnel Hygiene

Image 01

Leading through innovation

Holistic solutions for hygiene and food safety

The success of our clients depends on a well-functioning hygiene plan in which all the individual components work together seamlessly.

PHT therefore develops holistic hygiene solutions that align seamlessly with new and existing facilities in the food supply, cosmetics and pharmaceutical industries, as well as for commercial kitchens and catering facilities.

Personnel Hygiene

In the food industry and in companies with hygiene-sensitive areas, ensuring personnel hygiene through appropriate hygiene technology is fundamental. PHT creates customised hygiene solutions and supplies the appropriate hygiene technology - from changing rooms and lockers to hygiene lobbies and all the necessary hygiene equipment at the workplace. Our systems are safe to handle, energy-efficient and stable in use - and they also offer maximum occupational safety.

Well-considered hygiene technology from entrance to exit

- ▶ Employee entrance
- ▶ Lockers for valuables or food
- ▶ Lockers for Helmets and bags
- ▶ Lockers
- ▶ Dispensers
- ▶ Wash basins
- ▶ Hand sanitizing
- ▶ Laundry lockers
- ▶ Laundry return
- ▶ PPE and Workwear
- ▶ Boot and shoe dryer
- ▶ Apron storage
- ▶ Shoe storage
- ▶ Soap dispensers
- ▶ Coat storage

- ▶ Apron and boot cleaning station
- ▶ Sole cleaning
- ▶ Portal hubs
- ▶ All in one sole cleaning and hand sanitizing
- ▶ Sit-over bench
